

Vulnerability and Agency in Charity Advertising Language

Kaitlin Cox

August 10, 2026

Table 1: Negative Binomial Regression Models Predicting Thematic Language

	Structural Vulnerability	Personal Vulnerability	Global North Activity
Intercept	0.007*** (0.002, 0.027)	0.004*** (0.002, 0.010)	0.023*** (0.014, 0.037)
Global South	1.631 (0.727, 3.660)	1.049 (0.583, 1.886)	1.125 (0.884, 1.431)
Noise Ratio	0.083 (0.000, 8203.129)	0.000** (0.000, 0.047)	0.133 (0.001, 19.396)
Structural Vulnerability		1.029+ (1.000, 1.059)	0.989 (0.972, 1.007)
Num. Obs.	82	82	82
AIC	364.7	223.7	472.8
BIC	374.3	235.7	484.8
Log. Lik.	-178.356	-106.836	-231.402

Notes: Estimates are Incidence Rate Ratios (IRR). 95% Confidence Intervals in parentheses based on robust standard errors.
